

LifeStraw 2.0 | A Household's Water Filtration Solution

Providing environmentally sustainable, bacteria- & parasite-free drinking water for the family

- Ultrafiltration membrane cartridge (pore size of 20 nanometres), removes 99.99% of bacteria, parasites, viruses
- Reduces turbidity, no electricity required
- 5-litre storage capacity, filters up to 30,000 litres of water
- Quality-tested, consistently met WHO's performance criteria
- Positive results from global studies

Since LifeStraw essentially filters away bacteria, parasites, viruses and microplastics, some types of water are more ideal than others for use with this innovative system. Contact us for details.

Why is this important?

- ▶ Less than 1% of the world's freshwater is readily accessible¹
- ▶ Water pollution has caused 1.8 million deaths in 2015 while sicknesses from contaminated water affect 1 billion people each year²
- ▶ Aligned with one of the 17 sustainable development goals (SDG) of the United Nations Development Programme³: Clean Water & Sanitation
- ▶ Natural disasters such as hurricanes, floods and landslides will inevitably lead to water-safety issues, with the need for safe drinking water becoming an even higher priority
